

Project Design Phase-II Data Flow Diagram & User Stories

Date	31 January 2025
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Data Flow Diagram (DFD)

Matter to Include

Your DFD should show how data moves through the system — from applicant input to final decision.

Level 0 (Context Diagram):

- **External Entities:** Applicant, Bank System, ML Model.
- **Process:** “Credit Card Approval Prediction.”
- **Data Stores:** Applicant Database, Model Repository.
- **Data Flow:** Applicant → Application Data → ML Model → Approval Decision → Bank System → Applicant.

Level 1 (Detailed Flow):

1. Applicant submits data (income, age, credit history).

2. Bank system validates and stores data.
3. ML model retrieves data for prediction.
4. Model outputs “Approved” or “Rejected.”
5. Decision sent back to applicant dashboard

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Applicant (Web/Mobile User)	Registration	USN-1	As a user, I can register by entering my email, password, and confirming my password.	I can access my dashboard.	High	Sprint-1
	Login	USN-2	As a user, I can log in using my credentials.	I can view my application status.	High	Sprint-1
	Application Submission	USN-3	As a user, I can fill out and submit my credit card application form.	My data is saved and sent for review.	High	Sprint-1
	Status Tracking	USN-4	As a user, I can check my application status (Approved/Rejected).	I can view real-time updates.	Medium	Sprint-2
Bank Executive	Review Applications	USN-5	As an executive, I can view applicant data and model predictions.	I can verify and finalize decisions.	High	Sprint-2
Administrator	Manage System	USN-6	As an admin, I can monitor model performance and update datasets.	I can ensure system accuracy and fairness.	Medium	Sprint-3

Credit Card Approval Prediction Data Flow Diagram

Operational

- Approve approval process
- Provide validation and status

Process Owner

- ML System + Bank
