

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	02 JULY 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Application Submission	Fill and submit credit card application form with personal and financial details
FR-4	Prediction & Decision	ML model predicts approval or rejection based on applicant data
FR-5	Status Tracking	User can view real-time application status (Approved / Rejected)
FR-6	Admin Dashboard	Admin can monitor model performance, manage datasets, and view analytics

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The interface should be intuitive, responsive, and easy to navigate for applicants and bank staff.
NFR-2	Security	All user data must be encrypted; authentication via secure login and OTP verification.

NFR-3	Reliability	The system should consistently deliver accurate predictions and maintain uptime above 99%.
NFR-4	Performance	Model inference and dashboard loading should complete within 3 seconds.
NFR-5	Availability	The system should be accessible 24×7 with minimal downtime.
NFR-6	Scalability	The architecture should support increasing user loads and data volume without performance degradation.
