

Project Design Phase
Proposed Solution Template

Date	03 JULY 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Applicants face delays and uncertainty in credit card approval due to manual verification and inconsistent criteria. Banks struggle with high workloads and inaccurate decisions.
2.	Idea / Solution description	Develop an AI-powered web application that predicts credit card approval using machine learning models trained on applicant data. The system automates decision-making, provides real-time status updates, and ensures fairness and transparency.
3.	Novelty / Uniqueness	Integrates predictive analytics with user-friendly dashboards for both applicants and administrators. Uses explainable AI to justify decisions and reduce bias.
4.	Social Impact / Customer Satisfaction	Enhances trust and satisfaction by providing faster, fairer, and transparent approvals. Reduces anxiety and improves accessibility for applicants.
5.	Business Model (Revenue Model)	Subscription-based SaaS model for banks and financial institutions. Revenue through licensing, analytics services, and API integration.
6.	Scalability of the Solution	Designed with modular architecture and cloud deployment (AWS/IBM Cloud) to handle increasing users and data volume efficiently.
