

Planning Logic

Concept Overview

A Sprint is a fixed period during which your team completes a set of tasks. An Epic is a large task broken down into smaller Stories, each with assigned Story Points representing effort. Story Points follow the Fibonacci sequence (1, 2, 3, 5) to estimate complexity.

Sprint Breakdown

Sprint 1 – Data Collection & Preparation

Epic	User Story	Task	Story Points
Epic 1: Data Collection	USN-1	Gathering Data	2
	USN-2	Loading Data	1
Epic 2: Data Preparation	USN-3	Handling Missing Values	3
	USN-4	Creating Fields	3
	USN-5	Handling Inconsistency in Data	3
Total Story Points (Sprint 1)			12

Sprint 2 – Visualization & Dashboard

Epic	User Story	Task	Story Points
Epic 3: Data Visualization	USN-6	Bar Chart	2
	USN-7	Pie Chart	2
	USN-8	Line Chart	2
	USN-9	Map	4
Epic 4: Dashboard	USN-10	Developing Dashboard	5
Epic 5: Story	USN-11	Developing Story	5
Total Story Points (Sprint 2)			20

Velocity Calculation

$\text{Velocity} = \frac{\text{Total Story Points Completed}}{\text{Number of Sprints}} = \frac{32}{2} = 16$

Team Velocity = 16 Story Points per Sprint

Total Story Points

Sprint 1 = 12

Sprint 2 = 20

Velocity= Total Story Points Completed/ Number of Sprints

Total story Points= 12+20=32

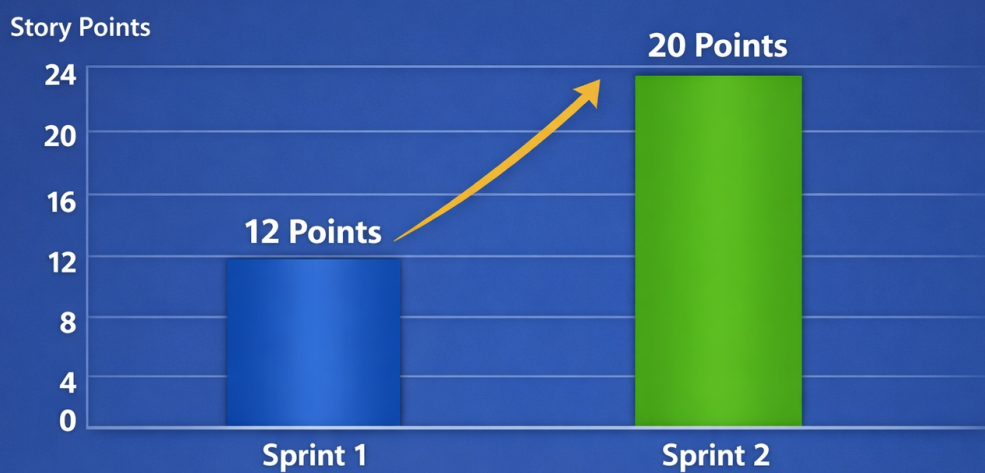

No of Sprints= 2

Velocity =32/2

16(Story Points per Sprint)

Your team's velocity is 16 Story Points per Sprint.
